

NEW DENON 2016 REMOTE APP

Our brand new app for iOS, Android and Kindle Fire will give you an unprecedented level of command and control over your network-ready Denon AV Receivers*. Most remarkably, the clever Queue management now makes it possible to browse your music library while listening to your favourite songs. Selected tracks (one or a whole album) can set to “Play Now”, “Play Next” or “Add to end of the Queue” and even more options are available. After a listening session the Queue can get edited and even saved as a playlist for later playback. And all of this on the fly.

Along with many new features, the graphics and user interface have been completely overhauled. The new app gives you full control of the AVR as well as access to its setup menu for detailed adjustments from your phones or tablets. Denon 2016 AVR Remote also gives you quick access to the receiver's status display, option menus, Denon Blu-ray player control, and online owner's manual for your convenience.

* (supported models: AVR-X6200W, AVR-X4200W, AVR-X3200W, AVR-X2200W, AVR-X1200W; for other models please download our previous “Denon Remote App”)
