DIVINE SOUND

Located just 600 feet from Ground Zero in Lower Manhattan in New York City, the Trinity Church saw its 30-year-old pipe organ destroyed in the aftermath of 9/11. So, they opted for Opus 1, the Epiphany, a virtual pipe organ that is nothing short of revolutionary. Needing robust yet musical speakers to reproduce their original organ's sound—complete with 9,000 pipes that ranged from 2-inch tubes to mammoth 32-footers capable of 16-Hz notes—Trinity employed the power of 60 Definitive Technology BP 10B tower speakers and eight BP 30 bipolar tower models because our superior audio matched the glory and vision of their world-class sound stage

SUBWOOFERS

THE ULTIMATE IN BASS PERFORMANCE

Engineered to enhance sound without overpowering it, we’ve built our subwoofers to deliver rock-solid low distortion bass that reaches down to the lowest frequencies, so they perfectly blend in with any main speaker. Whether you go for the astoundingly compact, yet sonically robust subs in the SuperCube Series, or opt for the winning combination of high output, extended and lightning-fast response in the ProSub Series, the result is always accurate, high-impact bass performance for superior home cinema sound and life-like musical reproduction.

PRO CINEMA SERIES

HUGE SOUND SCALED DOWN

ProCinema loudspeakers satisfy your need for small, easy-to-place yet sophisticated speakers that deliver the big, high-performance sound you crave. And with ProMonitor satellites that are small enough to fit in the palm of your hand, they can be easily wall-mounted, shelf-mounted or used on floor-stands, making for perfect audio integration into any room’s décor. The reproduction of sound in this series feels so real—so full of depth—all you have to do is close your eyes and it’s hard to believe that what you hear isn’t coming from a tower speaker.

DI SERIES
DISAPPEARING IN-WALL SERIES

When exceptional sound from a built-in home cinema speaker system is a main endeavor, the Disappearing In-Wall Series is waiting at the end of your search. With their Balanced Dual Surround System (BDSS) technology and pivoting pure aluminium dome tweeters, the speakers in this line give you that world-class audio performance found in our free-standing speakers, yet remain easy-to-install for the avid do-it-yourself purist because of their straightforward built-in configurations. All models in the Disappearing In-Wall Series are nearly invisible to the eye thanks to their small footprint, hidden bezel design, and low-profile micro-perforated grilles. Just like those traditional bezel flush-mount speakers that feature easy installation, these speakers don't require custom sheetrock/spackle skills to install—all the while out of sight but never out of earshot.

ALL-WEATHER SERIES

Ready to experience the Definitive sound anywhere around your home? We've taken alfresco listening to a level only our speakers can achieve with the All-Weather Series. Their fully sealed design, aluminum grilles, and rugged PolyStone enclosures mean these speakers handle the harshest elements and toughest acoustic conditions—and still deliver that full-range sound for years to come. Plus, they feature high excursion active drivers pressure-coupled to racetrack-shaped low-bass radiators to give you more than double the bass output while maintaining a weather-tight seal for ultimate placement flexibility, reliability, and performance. Now you can have that superior Definitive Technology sound on the patio, deck, in the garden, by the pool or in the sauna—the possibilities are whatever you decide.
